

Round Table on Statistical Methods in HEP

<http://www.ge.infn.it/geant4/analysis/HEPstatistics>

A. Pfeiffer, **CERN** and M.G. Pia, **INFN Genova**

The Round Table was scheduled by conveners to take place on Thursday 27 March evening in the Category 9 parallel session from 17:30 - 17:50, i.e., after the end of the conference programme, while the participants would transfer the conference dinner. This schedule did not make it to the web page.

Several attempts from our side to convince the organizers of the parallel session to move the Round Table discussion into the "Poster and demo" session on Tuesday (this, being organized over lunch, would also allow for more than 20 minutes of discussion) did not succeed.

We therefore decided to cancel the Round Table discussion and our participation in the conference.

We certainly regret to have to do this, but we did not see the possibility for a useful discussion under the given circumstances.

CHEP 2003, San Diego (CA), 24-28 March 2003

Maria Grazia Pia, *INFN Genova*
